

pureAir 1500™

Breathe Easy

pureAir 1500 by GreenTech Environmental is a home or office Air Purifier with four different technologies that each contribute as part of a complete air and surface sanitisation solution for your indoor environment.

pureAir 1500 destroys pollution and contaminants from both air and surface such as those embedded in walls, ceilings, floors, carpets, furniture, clothing and countertops. These technologies help to sanitise everything in your home or office and reduce or eliminate airborne bacteria and viruses, odours including cigarette smoke, mildew, cooking odours and more.

Main Features

- ❖ Three Fan Speeds with Ultra-Quiet Fan Motor
- ❖ Photo Catalytic Oxidation (PCO) Technology
- ❖ Needlepoint and RF Ion Generation
- ❖ Electrostatic Washable Filter
- ❖ Activated Oxygen
- ❖ Adjustable Purifier Control up to 150 Square Metres
- ❖ Away Mode Timer for (2 hours) Special Cleaning in Unoccupied Spaces
- ❖ Full Function Remote Control
- ❖ Replaceable PCO Cell and Purification Plate

Main Benefits

- ❖ Significantly Reduces Mould, Bacteria and Viruses
- ❖ Eliminates Smoke & Odours – Doesn't Cover Them Up
- ❖ Cleans Both Air and Surfaces
- ❖ Removes Allergens from Your Breathing Space
- ❖ Easy to Set Up, Easy to Use
- ❖ Quiet and Powerful Operation

pureAir 1500's power cord stretches 3 meters, allowing you to place it almost anywhere

Unit Size | 17cm H x 16cm W x 16cm D **Unit Weight** | 4 kg

Power Input | 100-240 VAC 50/60Hz 2.5A

Effective Area | 150m² **Power Usage** 21W

Display Box Dimension | 28cm H x 18cm W x 18cm D

Display Box Weight | 7kg

Purchase with confidence!

pureAir 1500 is backed by a 1 Year Manufacturer's Warranty. If you have any problems within your first year of ownership contact Officeworks for a quick and easy fix!

Four Technologies

The pureAir 1500 incorporates four separate technologies unlike other filter machines and air products that only use one or two technologies. These technologies significantly reduce or entirely eliminate odours, smoke, pollen, dust, pet dander, mould, carbon monoxide, bacteria, viruses, volatile organic compounds (VOC's – Chemical Gases) and other unhealthy potentially dangerous indoor contaminants; even those long embedded in walls, ceilings, floors, carpets, furniture and clothing.

Photocatalytic Oxidation

The PCO technology in pureAir 1500 not only destroys biological contaminants caught inside the cell, it also produces a purifying plasma which breaks down odours, Volatile Organic Compounds (VOCs), mould, bacteria and viruses through molecule disassociation, resulting in trace carbon dioxide and water vapour.

Ionization

Needlepoint and pulse wave ionization creates a continuous high level of ions in the treated space which cause particles in the air to become attracted to each other like magnets.

As particles clump together, they are too heavy to remain suspended in the air and fall to the floor or are caught in filtration.

Activated Oxygen

Activated Oxygen, or Ozone, is a naturally occurring oxidizer found everywhere outdoors, with higher levels after thunderstorms. It breaks down chemicals and microbes and is especially adept at eliminating offensive odours. pureAir 1500's oxidation generator is completely scalable and when adjusted based upon the area being purified generates an effective yet low level of ozone considered safe and natural.

Electro-static Filtration

An advanced electro-static filter is included with pureAir 1500 to help keep the purifier clean as well as filter out particles clumped together through ionization.

Unlike expensive HEPA filters, the electro-static filter is washable and can be used for the lifetime of the pureAir 1500.
