

Breathe Easy

pureAir 50 by GreenTech Environmental is a compact yet powerful air cleaning system designed for small rooms like lockers, closets, cabinets, bathrooms, pet areas, garbage areas and kitchens areas. It's small size is perfect for travel, allowing you to take fresh air anywhere.

pureAir 50 destroys pollution and contaminants from the air. Ionisation and Activated Oxygen help to sanitise and reduce or eliminate airborne bacteria and viruses, odours including cigarette smoke, mildew, airborne allergens cooking odours and more.

Main Features

-  Convenient Plug-In Small Area Purifier
-  RF Ion Generation
-  Activated Oxygen
-  Adjustable Purifier Control up to 5 Square Metres
-  Quiet Operation and Low Maintenance
-  Energy efficient

Main Benefits

-  Significantly Reduces Mould, Bacteria and Viruses
-  Eliminates Smoke & Odours – Doesn't Cover Them Up
-  Purifies The Air
-  Removes Allergens from Your Breathing Space
-  Easy to Set Up, Easy to Use
-  Quiet and Powerful Operation

ELIMINATES ODOURS CLEANS AIR & SURFACES

Cigarette Smoke

Offensive Odours

Airborne Allergens

Mould & Mildew

Bacteria & Viruses

Unit Size | 10cm H x 9cm W x 6cm D **Unit Weight** | 180gms

Power Input | 100-240 VAC 50/60Hz 2.5A

Effective Area | 5m²-10m²

Purchase with confidence!

pureAir 50 is backed by a 1 Year Manufacturer's Warranty. If you have any problems within your first year of ownership contact Officeworks for a quick and easy fix!

Two Technologies

The pureAir 50 incorporates two separate technologies to create a much cleaner and healthier living space. These technologies significantly reduce or entirely eliminate odours, smoke, pollen, dust, pet dander, mould, carbon monoxide, bacteria, viruses, volatile organic compounds and other unhealthy indoor contaminants.

Ionization

Ionisation electrically charges particles in the air producing continuous high level of ions in the treated space which cause particles in the air to become attracted to each other like magnets. As particles clump together, they are too heavy to remain suspended in the air and fall to the floor or are caught in filtration.

Activated Oxygen

Activated Oxygen, or Ozone, is a naturally occurring oxidizer found everywhere outdoors, with higher levels after thunderstorms. It breaks down chemicals and microbes and is especially adept at eliminating offensive odours. pureAir 50's purification completely scalable and when adjusted based upon the area being purified generates an effective yet low level of ozone considered safe and natural.

Plug and Purify

Simply remove pureAir 50 from the package, plug it into your desired outlet and turn the dial to start cleaning the air in your environment. It's that easy!

Maintenance

pureAir 50 requires no maintenance aside from an occasional alcohol swabbing of the vent and port. These quick swipes will keep your unit clean and running smoothly.
